## HP ties up with Agilità

December 09, 2004

HP India has tied up with Agilità to strengthen its software offerings to its customers. This was announced at the HP Software Channel Partner Summit 2004 held in Shimla, from December 1 to 4. Agilità India will provide HP access to IT Service Management (ITSM) and IT Infrastructure Library (ITIL) training and consulting.

The alliance with Agilità India provides HP and its partners access to world-class Information Technology Service Management and Information Technology Infrastructure Library training and consulting. It also enables customers to have the best support as they meet challenges in quality improvement, cost-reduction, international compliance and creating an IT environment that is adaptive to the new pressures of doing business in India and abroad.

"IT Service Management is a key pillar for success of the Management Solutions for the Adaptive Enterprise. Together with skills of Agilità, HP OpenView solutions will provide an end to end offering to our customers building their IT Service Management practices within their organisations," said Amit Chatterjee, Country Sales Manager, Software Global Business Unit, HP India.
